

Peptide Purity Testing Intake Form

Test Descriptions & Pricing

Purity & Identification - \$150.00

This test uses HPLC and/or Mass Spectrometry to confirm the identity of your peptide and determine its chemical purity. It ensures your peptide is correctly synthesized and free of major impurities.

Net Peptide Content - \$20.00 **bundled with Purity & ID**

This test quantifies the actual amount of peptide present, excluding water, salts, or counterions. It provides an accurate basis for dosing in experimental settings.

Endotoxins - \$150.00 **(Additional Vial Required)**

Endotoxin testing determines whether bacterial endotoxins are present in your sample. This is critical if your peptide will be used in cell culture or in vivo experiments.

Conformity Testing – \$50 per Additional Vial- This test evaluates batch uniformity by comparing additional vials from the same lot to the primary sample analyzed for Purity & Identification. Multiple vials may be tested to verify consistency across the batch.
